

PRAFUL GADBAIL

DevOps Engineer

Pune, Maharashtra | +91-8087696782 | praful.gadbail01@gmail.com

LinkedIn: [linkedin.com/in/prafulgadbail](https://www.linkedin.com/in/prafulgadbail) | GitHub: github.com/prafulgadbail

PROFESSIONAL SUMMARY

DevOps Engineer with 2.5+ years of hands-on experience in cloud infrastructure, CI/CD automation, Infrastructure as Code, and Kubernetes-based deployments. Experienced in building and managing AWS, Azure, and GCP environments, automating microservices delivery, and implementing cloud security, monitoring, and operational practices. Strong hands-on experience with Terraform, Jenkins, Docker, Kubernetes, GitHub Actions, and Argo CD, with a focus on reliable and scalable deployments. Available for immediate joining.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS, Microsoft Azure, Google Cloud Platform (GCP)
- **AWS Services:** EC2, VPC, IAM, EKS, ECR, S3, Security Groups, Application Load Balancer (ALB), Auto Scaling, Route 53, CloudFront, AWS Certificate Manager (ACM), Secret Manager
- **Azure Services:** Virtual Network (VNet), Network Security Groups (NSG), Entra ID, Azure Kubernetes Service (AKS), Azure Container Registry (ACR)
- **GCP Services:** Virtual Private Cloud (VPC), VPC Firewall Rules, Google Kubernetes Engine (GKE), Artifact Registry
- **Infrastructure as Code:** Terraform (Modules, Variables, Outputs, Remote Backend, State Management)
- **CI/CD & GitOps:** Jenkins (Jenkinsfile, Declarative Pipelines, Controller-Agent, Credentials, GitHub Webhooks), GitHub Actions, Argo CD
- **Containers:** Docker, Dockerfile, Multi-stage Builds, Docker Compose, Container Networking, Image Tagging
- **Kubernetes:** Deployments, Services, ConfigMaps, Secrets, Ingress, HPA, Rolling Updates, kubectl, Helm
- **Monitoring & Observability:** Amazon CloudWatch, Prometheus, Grafana, Datadog
- **Build & Code Quality:** Maven, npm, SonarQube
- **Version Control:** Git, GitHub, Branching, Merging, Pull Requests
- **Operating Systems & Scripting:** Linux, Ubuntu, Bash, Shell Scripting, Python
- **Networking :** TCP/IP, DNS, HTTP/HTTPS, SSL/TLS, SSH, CIDR, Routing, NAT, Load Balancing
- **Databases:** Amazon RDS (PostgreSQL, MariaDB), DynamoDB, MongoDB Atlas

PROFESSIONAL EXPERIENCE

DevOps Engineer Intern | Hisan Labs Pvt Ltd, Pune

03/2026 – Present

- Provisioned **AWS infrastructure using Terraform** with reusable modules, variables, outputs, remote state, and environment-specific configurations covering VPC, subnets, routing, NAT, Security Groups, EC2, ECR, IAM, and EKS.
- Implemented **AWS IAM and security controls** using roles, policies, and least-privilege access; managed Jenkins credentials, Kubernetes Secrets, and application database credentials securely.
- Provisioned **Amazon RDS and MongoDB Atlas**, configuring application connectivity, database credentials, environment-specific settings, and troubleshooting application-to-database connectivity issues.
- Built **Jenkins Declarative CI/CD pipelines for 5+ Java microservices** using Controller-Agent architecture, automating Git checkout, Maven builds, SonarQube analysis, Docker image builds and tagging, ECR publishing, and EKS deployments with rollout verification.
- Created and maintained **multi-stage Dockerfiles** for Java Spring Boot microservices and frontend applications, managing container configuration, image tagging, and Amazon ECR registry workflows.
- Deployed and managed **Kubernetes workloads on Amazon EKS using Helm**, configuring Deployments, Services, ConfigMaps, Secrets, Ingress, replicas, environment variables, and resource requests/limits.

- Monitored and troubleshot **AWS, Kubernetes, Docker, CI/CD, and Linux environments** using CloudWatch, Prometheus, Grafana, kubectl, and logs; resolved build, image, pod, rollout, readiness, connectivity, and system issues using Bash and Python automation.

System Administrator | K12 Techno Services Pvt Ltd, Pune

07/2023 – 09/2025

- Managed **10+ Ubuntu/Linux servers on AWS EC2**, handling user and permission management, processes, systemd services, disk utilization, application logs, system health, and operational troubleshooting.
- Provisioned and maintained **multi-AZ AWS infrastructure using Terraform**, including VPC, public/private subnets, route tables, Internet Gateway, NAT Gateway, EC2, S3, and Security Groups.
- Managed **AWS IAM and Microsoft Entra ID (Azure AD)**, including users, groups, roles, permissions, access provisioning, and authentication-related troubleshooting.
- Delivered **IT infrastructure and network support to 1000+ users across India**, resolving system, network, access, and connectivity issues across distributed locations.
- Monitored **AWS and Linux environments using Amazon CloudWatch and Datadog**, analyzing metrics, logs, alerts, resource utilization, system health, and network connectivity; automated routine administration using **Shell scripting and Python**.

PROJECTS

Three-Tier AWS EKS Deployment with Jenkins CI/CD

GitHub: github.com/prafulgadbail/three-tier-student-registration-app

Tech Stack: AWS EKS, Docker, Amazon ECR, Jenkins, Maven, SonarQube, Kubernetes, Amazon S3, CloudFront, Route 53, ACM, Secrets Manager, External Secrets Operator, Prometheus, Grafana

- Deployed a **three-tier application on Amazon EKS**, with the Java Spring Boot backend containerized using Docker and Amazon ECR, and React frontend hosted on **Amazon S3 with CloudFront**.
- Implemented **separate Jenkins CI/CD pipelines for frontend and backend**, automating frontend builds and backend **Maven builds**, with **SonarQube Quality Gate**, Docker image creation, ECR publishing, and Kubernetes deployments.
- Configured **AWS Load Balancer Controller, Route 53, and ACM** for internet-facing access with **HTTPS and HTTP-to-HTTPS redirection**, and integrated **AWS Secrets Manager with External Secrets Operator** for secure database credentials.
- Implemented **Prometheus, Grafana, HPA, Metrics Server, Cluster Autoscaler, and EBS CSI** for monitoring, autoscaling, and persistent storage, with **Bash automation** for repeatable Kubernetes setup.

Microservices GitOps Deployment with GitHub Actions & Argo CD

Tech Stack: Docker, Docker Hub, GitHub Actions, Kubernetes, Kind, Argo CD, GitOps, Helm

- Containerized Java microservices using Docker, creating multi-stage Dockerfiles and publishing versioned images to Docker Hub for Kubernetes deployments.
- Built **GitHub Actions CI pipelines** to automate source checkout, Maven builds, application testing, Docker image builds and tagging, and Docker Hub image publishing.
- Implemented **GitOps-based Kubernetes deployments using Argo CD**, managing application manifests and continuously synchronizing the desired state with the **Kind Kubernetes cluster**.
- Configured Kubernetes **Deployments, Services, ConfigMaps, Secrets, resource requests/limits, and rolling updates** on Kind, with Argo CD providing deployment synchronization and application status visibility.

EDUCATION

B.Tech – Computer Science & Engineering | Eklavya University, Damoh

2021 – 2024
